Bottlenecks - platformoverview

Release draft (26560e7)

OPNFV

August 23, 2016

BOTTLENECKS INTRODUCTION

Welcome to bottlenecks' documentation !

Bottlenecks is an OPNFV Project.

The project's goal is to find system bottlenecks by testing and verifying OPNFV infrastructure in a staging environment before committing it to a production environment. Instead of debugging a deployment in production environment, an automatic method for executing benchmarks which plans to validate the deployment during staging is adopted. This project will provide frameworks to find the bottlenecks of OPNFV infrastructure.

The *Bottlenecks* framework is deployed in several OPNFV community labs. It is installer, infrastructure and application independent.
