## **OVSNFV DESCRIPTION**

Open vSwitch (OVS) is a software switch commonly used in OPNFV deployments. OVSNFV project supplies a Fuel Plugin to upgrade DPDK enabled Open vSwitch on an OPNFV to 2.5.90.

## OVSNFV CAPABILITIES AND USAGE

After installation use of the scenario requires no further action by the user. Traffic on the private network will automatically be processed by the upgraded DPDK datapath.
